

Gen AI and Agentic AI in Production

Week 1
Day 1

Production-grade AI starts now

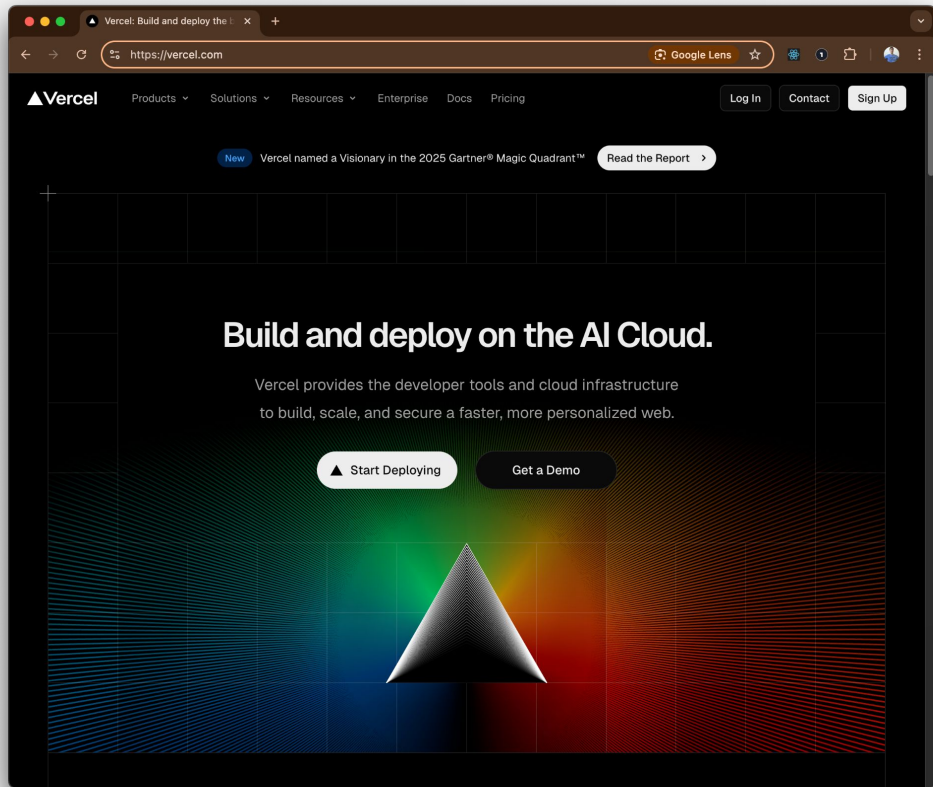

First let's cover objectives, introduction, curriculum, logistics

Actually, let's not.

I always start with **INSTANT GRATIFICATION!!**

GENERATIVE AI & AGENTIC AI IN PRODUCTION

Live with Vercel in minutes

I'M SO HAPPY TO WELCOME YOU TO

Production Grade AI!

Prepare for hardcore learning

The most ground I've covered in any course

Prepare for juicy projects

The most commercial, hands-on projects I've made

Prepare for A TON OF FUN

It's so satisfying to roll out changes at production scale

Who is **this FOR?**

Entrepreneur

Rapidly deploy a SaaS AI app to Production with authentication and subscription, built for scale

Enterprise

Scale an AI application on a major cloud provider; relevant expertise for enterprise roles

And everyone in between

By the end of the course and the assignments, you will be able to:

1. Deploy and monetize your AI application
2. Implement production-grade AI with transferable skills
3. Apply to roles that require production skillset

How does this fit?

AI Briefing for Founders & Leaders

AI in Production

LLM Engineering

Agentic AI

All the courses are complementary

You can take them in any order

Most natural: LLM Engineering,
Agentic AI, AI in Production

*All levels of background -
something for everyone*

I should mention something...

You may be expecting:

The reality:

There are some AI concerns like Observability and running MCP Servers..

..but the bulk is traditional cloud platform engineering

The course follows a T

Vercel, AWS, GCP, Azure, Docker, CICD, Github Actions, ...

AWS

4 Week Journey to Prod-Grade

Week 4: Agentic AI in Production

Multi-Agent
Architecture

Capstone:
Agents on
AWS

Capstone:
Frontend

Observability
Monitoring
Security

Agentic AI
Platforms

Week 3: Azure, GCP, Data Engineering, Vectors, MCP

Cyber AI on
Azure with
MCP

Cyber AI on
GCP with
MCP

Amazon
SageMaker

Data Ingest
S3 Vectors

Data Pipes
with MCP

Week 2: AI Platform Engineering on AWS

AWS
Architecture

The Digital
Twin Mk 2

Amazon
Bedrock

Terraform

Github
Actions

Week 1: SaaS Generative AI in Production

First Gen AI
Deployment

Frontend &
Backend

Auth &
Subscription

Healthcare
SaaS App

Deploy to
AWS

Course Scope

OUT OF SCOPE!!!

Scope is primary AWS but touches on others

I've used non-AWS industry standard where applicable
- like Terraform over CDK, for more transferable skills

I touch on areas like Frontend and Docker but at surface level;
you may need to research yourself - and use self-study guides

Overall goal is to equip you to apply principles elsewhere

API costs - YOU are in control

Super important

Most activities are free

Some have cost - particularly AWS

Should be around \$5-10 all in, plus optional domain registration, but not guaranteed - please monitor

Always your choice

API costs are your responsibility -

I will show you how to monitor them and set alerts

*Unlike OpenAI, most services have alerts but no caps - **you are responsible for monitoring API spend!***

Here's the thing:

In my previous courses:

But this course:

***Platform Engineering is largely
environment setup!***

PLATFORM ENGINEERING CAN BE

FRUSTRATING!!!

Environment roadblocks can be MADDENING!

A simple typo in `us-east-1` or `OPENAI_API_KEY` can take hours to track down

Complex issues like building a binary on a Mac that then fails with an obscure stack trace on AWS can take days

Please agree to my terms!!

1. I will embrace **every roadblock** with a **positive attitude** - this is where the learning happens!
2. I will be happy to **roll up sleeves and dig in** and do research and experiments myself and post on forums
3. I will use LLMs to help, but I recognize their blind-spots and will **verify everything** they suggest
4. I will post issues on Udemy, and Ed will try to help, but I understand that it's not like code and if Ed can't reproduce, then I'll need to **stick at it** or move on
5. I'll look for opportunities to **help others** in the community that are stuck

I AGREE

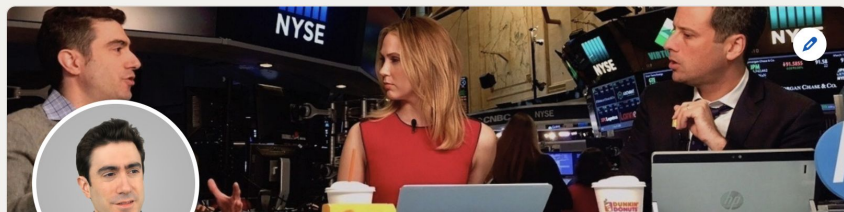

GET IN TOUCH

I am **HERE TO HELP**
